

Waleed Tarek

13 May 2026 ~15 minutes Pakistan Onboarded 2 months ago

WHO HE IS

Waleed runs a point-of-sale services business in Pakistan serving restaurants. His primary Fasset use case is paying for the cloud and ad tools his business runs on: Google, Meta ads, and similar online services.

WHY HE'S HAPPY

Moved half his volume to Fasset in month one. Buys dollars via P2P, spends via the Fasset card. His Pakistani card carries heavy tax on international transactions.

10–12%

Cost saving vs. Pakistani card on international spend

Currently in Thailand, booked the entire trip on the Fasset card. Called it a "really smooth experience."

FEEDBACK

1 More P2P merchants PRODUCT

Wants more sellers on P2P for competitive pricing. Thought it was only Fasset selling dollars. I clarified it's independent traders, but we should look at surfacing more active merchants to give the perception and reality of more choice.

2 Can't find chat with merchant UX FOLLOW-UP NEEDED

Said there was no way to chat with the P2P merchant. The feature exists, so this is a discoverability issue. Didn't have time to dig in during the call. Need a follow-up to understand exactly where he got stuck.

3 Card statement history too short PRODUCT

Statement shows only the last two weeks. He wants full historical transaction history. Using Fasset for business spend and travel makes this a real gap. Ties to the Statement of Account initiative.

FOLLOW-UPS

- ☐ Explore P2P merchant visibility: how many active traders are showing and is there a way to surface more?
- ☐ Follow up with Waleed on the "no chat" issue to understand the exact UX drop-off point.
- ☐ Card statement history gap: link to Statement of Account initiative and check current prioritisation.
